Leningrad Airframe Plant 458 is located on the NW edge of Leningrad, USSR, in juxtaposition to Leningrad/Kolomyagi Airfield [REDACTED] photography revealed approximately 45 cylindrical objects in a yard in the western half of the plant, adjacent to a large, recently constructed assembly building. The median dimensions of the objects are about [REDACTED] and they appear to be tapered at one end; they have been tentatively identified as possible missile or aircraft airframes. Objects not too dissimilar in size and configuration have been observed at Airframe Plant 126, Komsomolsk-na-Amure, USSR.
